

STUDENT-DRIVEN GLOBAL HACKATHON

JUNCTION X KYUTECH 2026

Call for Hackers & Creators!

DATE Sep 25 (Fri) – 27 (Sun), 2026

VENUE GYMLABO (Tobata Campus)

What is JUNCTION?

JUNCTION is a global hackathon and tech community, spreading the word of empowering people to create with technology. JUNCTION X lets local tech communities around the world create their own hackathon, bringing together developers, designers, and all other techies.

JUNCTION X KYUTECH is an international hackathon organized by Kyutech's student community, officially supported by JUNCTION.

3 Days

Intensive building from Friday afternoon to Sunday night

International

English is the official language — a truly global experience

Free Entry

No fee. Meals and snacks provided during the event

2026 CONCEPT

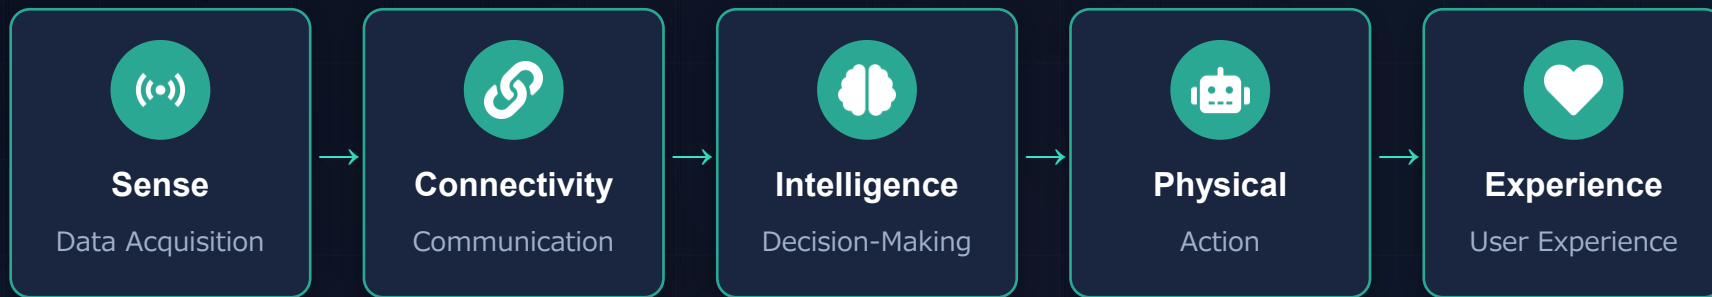

INTERACTIVE WORLD

— *Hack the World Interface* —

Hack the interfaces between people and systems, and between systems and the real world. Build products that don't end on the screen — products that interact with the world.

Create Systems That Work in the Real World

Rather than focusing on developing standalone applications, the goal is to build systems that operate effectively in real-world environments by integrating multiple technologies. By combining sensors, communications, AI, and robotics, participants are expected to implement systems that can respond to human actions and changes in the environment, creating solutions that actually work in the real world.

Connect × Decide × Act × Deliver Experiences

Tracks

Choose one of three tracks and build your product around it.

TRACK 01

Hack Extreme Environments

Space as Constraint

TRACK 02

Hack Connected Everywhere

TRACK 03

Hack the Physical World

Who We're Looking For (1/2)

These six roles are a guide, not a rule — one person can wear multiple hats in a team.

Frontend Engineer

Role: Design the interface connecting users and the system

Position: The touchpoint that lets users understand and operate the system

Backend Engineer

Role: Design internal processing and coordination between components

Position: The core that connects every element and makes the whole system work

AI Engineer

Role: Design the system's decision-making and judgment logic

Position: Decides how the system behaves based on its inputs

Who We're Looking For (2/2)

Robotics / Hardware Engineer

Role: Realize actions and effects in the physical world

Position: Turns system output into actual, physical motion

System Designer (Architect)

Role: Design the structure of the system as a whole

Position: Sees the big picture and makes everything work as one integrated system

UX / Experience Designer

Role: Design the end-to-end experience of the system

Position: Elevates the system from “something used” to “a valuable experience”

Language

English is the official language

In English

Announcements / demos / final presentations

Any language OK

Conversations within your team while developing
don't have to be in English

Not fully confident in English? That's no reason to hold back — it's your chance to experience an international event.

Event Overview & Prizes

Dates

Sep 25 (Fri) 13:00 – Sep 27 (Sun) evening, 2026

Venue

GYMLABO — Kyushu Institute of Technology (Tobata Campus), Kitakyushu

Who can join

University students, developers, designers, and planners interested in global hackathons

Teams

Up to 4 members per team. Solo applications welcome.

PRIZES

Grand Prize

200,000 JPY

+ Golden Ticket

Schedule

DAY 1 | FRI 9.25

13:00–13:30

Registration

13:30

Opening Ceremony

14:00–15:00

Team Building

16:00

Hacking Starts

19:00–20:00

Dinner

DAY 2 | SAT 9.26

All day

Hacking

DAY 3 | SUN 9.27

Morning

Final Hacking Session

12:00

Lunch

13:00

Presentations & Demos / Judging

17:00

Award Ceremony

18:00

Networking Party

*Schedule is subject to change without prior notice

FAQ

- | | | |
|----------|--------------------------------------|--|
| Q | Is there a fee? | None — free to join. Meals and snacks are provided during the event. |
| Q | Is there a selection process? | Yes. Not first come, first served — participants are chosen based on application answers. |
| Q | Can I apply solo? | Yes! Team-building sessions will be held on the first day of the event. |
| Q | Travel & accommodation? | Self-funded. A rest zone is available inside the venue. No parking — public transport recommended. |
| Q | Who owns the project IP? | Your team does. JUNCTION X KYUTECH doesn't claim any rights. |

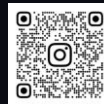

How to Apply

Apply now via the application form!

1. Open the application
2. Answer a few questions and submit
3. Wait for the selection results
